this project is posthumously dedicated to dr gregory dana bossart whether you knew him as colleague mentor friend family member or simply knew of him you could not help but be awestruck by his dedication intelligence thoughtfulness work ethic and passion for scientific inquiry especially for conservation of the marine environment many of his publications were seminal in marine mammal health including infectious environmental and zoonotic diseases as we collected manuscripts for this special frontiers edition it was heartwarming to hear the comments from contributors so many research scientists field biologists and veterinarians could easily have given up and said i just can t do this now especially with the added challenges posed by the current covid 19 pandemic instead contributors from around the world were determined to contribute to this collection because of their inspiration and shared commitment with greg s vision the love and admiration within the marine community for greg is phenomenal with that said we would be remiss if we did not say a few words about greg as a mentor and friend greg had a knack for helping students realize their abilities and pursue their own independent contributions to the marine mammal community he shared in their successes and worked tirelessly to facilitate their aspirations greg would involve students early career scientists and colleagues in projects introduce them to collaborators and promote them and their work greg was a genuinely caring person when he asked you how are you doing he honestly wanted to know he was always there ready to listen and provide guidance if you were to ask greg what was most important to him in life he would say god family and marine life and one could argue that he had a special fondness for manatees he believed in the beauty of nature and that god had a hand in all of it he was in pursuit of

ensuring that we all share this earth responsibly and sustainably we miss greg dearly but honor and celebrate him as we carry on in our pursuits

the book provides a summary of the historical evolution of dimensional analysis and frames the problem of dimensions systems of units and similarity in a vision dominated by the conventions that formalise even the exact sciences the first four chapters address the definitions with few dimensional analysis theorems and similarity criteria there is also the analysis of self similarity both of first and second kind with a couple of completely solved problems framed within the group theory from chapter 5 onward the focus is on applications in some of the engineering sectors the number of topics is necessarily limited but almost always there are details calculations and treatment of assumptions the book contains descriptions of some of the experimental apparatuses currently used for the realisation of physical models such as the wind tunnel the shaking table the centrifuge and with the exclusion of many others which can be found in specialist monographies measurement techniques and instrumentation and statistical data processing is also available in other books some more specific notions required by the context are reported in the appendix where appears also the description of numerous dimensionless groups all of engineering interest but with the exclusion of many others related to physical processes of electrical nature or physics of particles a glossary lists the meaning of some specific terms typical of dimensional analysis and used in the book
