this book is about trying to answer questions these questions were well introduced by prof margaret hall in the opening of her chapter in this book the fundamental idea of law and aging as a discrete category of legal principle and theory is

controversial how and why are older adults or seniors or elders the very terminology is controversial and fraught with difficulties a discrete and distinct group for whom special legal thought and treatment is justified for some a category of law and aging is inherently paternalistic suggesting that older persons are like children especially in need of the protection of the law in this sense the argument continues the category itself internalizes ageist presumptions about older adults and is therefore inherently flawed and even harmful if certain older adults are because of physical or mental infirmities genuinely in need of an enhanced level of legal protection this entitlement should be conceptualized in terms of their disability older adults are not a distinct group but an arbitrarily delineated demographic category which contains within it any number of groups that are legitimately distinct for the purposes of legal theory the disabled women persons of colour aboriginal persons rich and poor etc indeed the artificial category of older adults may be seen as obfuscating submerging these more meaningful distinctions

the theory of white fragility is one of the most influential ideas to emerge in recent years on the topics of race racism and racial inequality white fragility is defined as an unwillingness on the part of white people to engage in the difficult conversations necessary to address racial inequality this fragility allegedly undermines the fight against racial inequality despite its wide acclaim and rapid acceptance the theory of white fragility has received no serious and sustained scrutiny this book argues that the theory is flawed on numerous fronts the theory functions as a divisive rhetorical device to shut down debate it relies on the flawed premise of implicit bias it posits a faulty way of understanding racism it has serious methodological problems it conflates objectivity and neutrality it exploits narrative at the expense of facts it distorts many of the ideas upon which the theory relies this book also offers a more constructive way to think about whiteness white privilege and white fragility pointing us to a more promising vision for addressing racial inequality

this english translation makes available to anglophone readers a modern classic of german tort theory it argues that modern german tort law is faced with doctrinal tensions based on problematic theoretical assumptions which stem from historical conceptions of tortious liability inappropriate to modern times from a theoretical perspective it argues against the prevalent doctrinal view in germany that conceives of tortious liability as split between two tracks a fault based track and a strict liability track each with different normative foundations instead jansen asserts that there is no rigid distinction between the normative foundations of each form of liability rather both fault liability and strict liability in german law and indeed other european systems are best considered as resting upon the unifying theoretical structure of outcome responsibility the book thus places responsibility rather than wrongdoing at the centre of the normative foundations of tort law historically the book traces in detail how conceptions of tort liability have changed from roman law to contemporary legal doctrine it shows how particular historical understandings of the normative basis of tort law have led to continuing normative tensions in contemporary doctrine finally the book examines how a reconstruction of modern german and indeed european law as based upon outcome responsibility should affect its doctrinal structure this book makes contributions to the study of the theory history and doctrinal structure of tort law while drawing on and explaining german tort law its comparative theoretical and historical analysis will be of interest to scholars in all legal systems
